

CO₂ Pedometer

Be aware of the CO₂ emission in this world. The ECO CO₂ Pedometer measures calories burned, distance travel, target steps and most of all the CO₂ reduced by walking more instead of using vehicles for transport. Activities like driving a car creates a certain amount of Co₂ from the engine burning fuel, depending on the fuel consumption and driving distance it is one of the reason the environment is being damaged. The ECO CO₂ Pedometer will be your first step to monitor and reduce your carbon footprint (CO₂) with a new approach. Aprx. ø 5,2 x 2 cm.
