

## CO<sub>2</sub> Pedometer

Be aware of the CO<sub>2</sub> emission in this world. The ECO CO<sub>2</sub> Pedometer measures calories burned, distance travel, target steps and most of all the CO<sub>2</sub> reduced by walking more instead of using vehicles for transport. Activities like driving a car creates a certain amount of Co<sub>2</sub> from the engine burning fuel, depending on the fuel consumption and driving distance it is one of the reason the environment is being damaged. The ECO CO<sub>2</sub> Pedometer will be your first step to monitor and reduce your carbon footprint (CO<sub>2</sub>) with a new approach. Aprx. ø 5,2 x 2 cm.
